

Contents

1	Prologue	3
2	Cardiac Electrophysiology	5
2.1	Activity on the Cellular Level	7
2.2	The Monodomain Equation	8
3	Mathematical Ingredients	9
3.1	Space-Time Solvers	9
3.2	Newton's Method	12
3.2.1	Derivation	12
3.2.2	Convergence or Globalisation Strategies	12
3.3	Finite Element Methods	13
3.3.1	General Setting	13
3.3.2	Discretisation	14
3.3.3	Matrix Formulation	15
3.4	Least Squares Finite Element Methods	15
4	Problem Formulation	19
4.1	Set Up	19
4.2	Least Squares in Space - Time	21
4.3	Linearisation	21
4.4	Overall Problem	21
4.5	Derivation of the Derivatives	21
4.6	Overall Assembly	24
5	Multigrid Methods	25
5.1	General Idea	25
5.2	Basic Algorithm	26
5.3	Convergence Properties and Complexity	26
5.4	Algebraic Multigrid	27
5.4.1	Essential Concepts	27
5.4.2	Coarse Space Construction Based on Eigenfunctions	27
6	Implementation and Numerical Results	28
7	Conclusions and Outlook	30
8	Epilogue	31
